EXPERIENCE

March 2022 - April 2023

Technical Content Writer Learn and Build | Remote

I was hired as an intern and later shifted to a part-time employee in a tech based start-up called Learn and Build where I got enhance my skills up to a professional level as a writer. I wrote for various domains , technical being the most crucial and major one among all of them . From Linkedin posts to emails Carousal Contents for Instagram, there were lots of stuffs I worked on here. Overall, it was a really fun as well as quite a learning journey for me there. I also received my first LOR from the same .

- Carefully selected correct mediums for communication depending on audience and information required.
- Worked closely with comms, design and strategy teams to generate creative ideas and meet client's objectives.
- Researched content topics by interviewing subject experts to create valuable, information-driven resources.

SUMMARY

I have had an experience of how a real work-frame goes on in tech based industries as I was a part of one, although as a content - writer, but yes, I observed things really closely.

When it comes to handling things related to tech, I believe I can handle it well because I have been enthusiastic in learning all that I got to and even more than that. Since I am a fast learner, I really grasp things easily and can cope up with any kind of situation.
